In the book *ASEAN Economic Community (AEC): Content and Roadmap*, the author introduces a variety of recommendations to heighten Vietnam’s participation in in the AEC. The author analysed the objectives, contents and roadmaps of AEC implementation. At the same time, he also discussed how Vietnam should participate in ASEAN economic cooperation programs. The book is a highly practical and necessary source that the policy makers in Vietnam should never bypass. By reading the book, they will find effective measures to increase Vietnam-ASEAN economic cooperation and Vietnam’s
international integration. If it can be done so, the benefits of the integration will be maximized and its impacts will be minimized especially when Vietnam became an official member of WTO.
